FOREWORD

This bibliography is a revised and enlarged edition of the "General Bibliography on International Organization and Post-War Reconstruction" published by the Commission to Study the Organization of Peace in its May-June 1942 *Bulletin* and supplemented in the January-February 1943 *Bulletin*.

Over two thousand books, articles and pamphlets are included, with the material classified under twelve main headings. Of course, no attempt was made to prepare a complete listing of the literature on war, peace and reconstruction. Rather, the bibliography was planned as a selected listing of material helpful to an understanding of international problems of reconstruction. Although the most recent publications were selected for each heading, many earlier writings are included.

In compiling the material, I found the reference services of the Woodrow Wilson Memorial Library invaluable, and I wish to express my gratitude to the staff of the Library for their generous assistance.
